

About me

I am a graduate in Algorithmic Informatics and currently pursuing a Master's degree in the same field. I am passionate about exploring the deeper aspects of computer science, which has led me to gain proficiency in multiple programming languages. During my studies, I developed a strong interest in low-level programming, particularly in areas such as optimization, memory management, and safety.

I enjoy continuously learning new technologies and approaches, and I adapt quickly to new challenges. I am open-minded, highly communicative, and value collaboration, which allows me to work effectively within a team and build strong professional relationships.

Experience

2023 – 2026 **Nokia Solutions and Networks Sp. z o.o.**
Software Engineer
Working Student

2021 – 2023 **DEX-DENT Pracownia Protetyczna**
IT Specialist
Monitoring and administration of IT systems

Education

2025 – 2026 **Wrocław University of Science and Technology**
Algorithmic Computer Science
Master's Degree

2021 – 2025 **Wrocław University of Science and Technology**
Algorithmic Computer Science
Engineering Degree

2018 – 2021 **Academic High School of the Wrocław University of Science and Technology**
Advanced mathematics, Physics, and Computer Science
High School

Skills

Languages:

- C++ (professional experience)
- Rust (advanced)
- Python, C, Java (intermediate)

Building and Testing:

- CMake
- Docker
- Podman
- Nix

Version control and collaboration:

- Git
- SVN
- Gerrit
- Github

Project environment and issue tracking

- Linux
- Jira
- Trello
